Professional Summary

Full Stack .NET Developer with hands-on experience building production-grade web applications using C#, .NET 8, ASP.NET Core Web API, React, and Angular. Proficient in Microservices, CQRS, gRPC, Redis, REST APIs, and SQL/NoSQL databases. Currently a Programmer Analyst Trainee at **Cognizant Technology Solutions**, focused on clean architecture, performance optimization, and Agile collaboration.

Technical Skills

Languages: C#, C, C++, JavaScript, TypeScript, SQL

Backend: .NET 8, ASP.NET Core Web API, REST APIs, gRPC, Microservices, CQRS (MediatR), Node.js, Express.js

Frontend: React.js, Angular, HTML5, CSS3, Tailwind CSS, IndexedDB (Offline Storage)

Databases: SQL Server, PostgreSQL, MongoDB, Redis, Entity Framework Core, LINQ

Tools & Platforms: Git, GitHub, Visual Studio, VS Code, Postman, Swagger, JIRA, Agile/Scrum

Experience

Programmer Analyst Trainee | Cognizant Technology Solutions

Jul 2025 – Present

- Developed scalable web applications using C#, .NET Core Web API, and **Microservices architecture**.
- Implemented **gRPC** for inter-service communication and **Redis** for distributed caching, improving API response times.
- Collaborated in Agile / Scrum ceremonies using JIRA and Git, contributing through code reviews and pull-request workflows.

Software Engineering Intern | Cognizant Technology Solutions

May 2025 – Jul 2025

- Trained on ASP.NET Core Web API, Angular, SQL Server, and Git version control.
- Built a full-stack e-commerce application as the training capstone project.

Projects

Production-Ready Clinical CRM | .NET 8, React, CQRS (MediatR), PostgreSQL

[GitHub](#) | [Live Demo](#)

- Engineered a high-performance CRM using **Vertical Slice Architecture** and **CQRS (MediatR)**, decoupling business logic across **20+ feature slices** for enterprise-scale maintainability.
- Implemented predictive prefetching, reducing perceived API latency by **60%** on the React frontend.
- Built a bulk CSV import system processing **10,000+ records** with row-by-row validation, duplicate detection, and structured logging (Serilog).

Full Stack E-commerce Application | ASP.NET Core Web API, Angular, JWT, EF Core, SQL Server

- Built a full-stack e-commerce platform with Angular and ASP.NET Core Web API, featuring **JWT authentication** and role-based authorization.
- Implemented product catalog, shopping cart, and order-management modules using Entity Framework Core and SQL Server, exposing RESTful endpoints via Swagger with **Repository Pattern** and **Dependency Injection**.

Certifications

Claude Certified Architect – Foundations | Anthropic ([Verify Credential](#))

- Certified in designing solutions with Anthropic's Claude LLMs: prompt engineering, agentic workflows, tool use, and responsible AI integration.

Education

Government College of Engineering, Karad | CGPA: 7.04 / 10

June 2021 – May 2025

Bachelor of Technology (B.Tech), Electronics and Telecommunication Engineering
